

D30® FORMABLE FOAMS

D30 uses a combination of patented, patent-pending and proprietary technologies to make rate sensitive, soft, flexible materials with high shock absorbing properties.

Our extensive material portfolio is compatible with many different production processes, with each material grade formulated and tuned to deliver specific performance properties.

Our current materials portfolio falls into four groups: Set Foams (Sf), Formable Foams (Ff), Set Elastomers (Se) and Formable Elastomers (Fe).

The **D30® Formable Foam** portfolio includes **D30® LITE** and offers lightweight, comfortable and temperature stable cushioning and protection.

The added benefit of **D30® Formable Foam** is that the shape of the material can be re-shaped to offer a versatile solution for a wide range of applications. Ideal for lower impact energies.

D30® Formable Foams

Code name	Synonym	Density	Hardness	Tensile strength	Elongation at break	Split tear strength	Compressive strength	Flexural modulus	Tensile modulus	Deceleration 4.5 J	Compression set	Water absorbency	Impact protection
