

Junior Test Engineer

D3O – The Company

D3O® is a British-based impact protection solutions company that markets a unique patented technology that is used to produce a shock absorbing material.

D3O works with global brands on a long-term basis to provide a key ingredient and added value proposition, achieved through a combination of material and product development agreements and standard offerings.

As a high performance branded material, D3O has many applications. Currently it is focused to deliver integrated products to the Sport, Electronics, Motorcycle, Defense, and Industrial PPE markets.

The company has developed a range of standard and bespoke products that have gained significant traction in key markets. D3O continues to innovate, challenge and lead the world of impact protection and shock absorption, delivering pioneering solutions for its customers.

The Role

Based in D3O's Croydon office, we are recruiting for a new position within the Testing team, who will report to the Testing Lab Manager. The successful candidate will provide support to the Testing department by completing requested testing activities and preparing test reports, working closely with the Sales and Marketing departments, Product Development and Material Development teams. As a rapidly expanding company, they will be someone who will develop with D3O, taking on more responsibility as opportunities arise.

Key Responsibilities

- Follow and comply with all safety, IT, Quality and company work rules and regulations.
- To support defined company projects by conducting require tests
- To carry out competitor product testing to support sales and marketing activities
- To support the maintenance and smooth operation of the testing lab through the correct use of equipment, supporting maintenance schedules, housekeeping and tidiness, and quality standards.
- Prepare testing reports
- Maintain all test records and databases
- Other department tasks as instructed by Test Manager

Preferred Experience / Skills

- Undergraduate qualification (BSc./BEng,) in a Science based subject or Engineering is required.
- Laboratory testing of products and materials would be an advantage
- Good communication and interpersonal skills
- Good computer literacy

- Fluent English, strong written communication skills

Personal Attributes

- Willingness to get the job done, and work in a fast paced and expanding business.
- Willingness to progress within the company - eager to succeed.
- Ability to plan own work schedules
- High attention to detail
- Process driven
- Team player able to adapt to working in a dynamic environment
- Being objective and pragmatic
- Must be able to see the bigger picture when making decisions.

Other Information

- Croydon office has a gym onsite and parking
- Standard office hours 8.30 - 5.30 with an hour lunch break
- Applicants must have the right to work in the UK
- D3O is an Equal Opportunities employer
